Custom Finishes

The Met series

There are two basic designs within the Met series, each with its own standard colour scheme: Nickel with black balls for the 6725-Foyer-series and polished brass with black central ball for the 6660-Auditorium-series. See top left for 6725 and top right for 6660. Note the tuft elements of 6660 in contrast to the sputnik elements of 6725.

Changing the basic metal finish of the fixture incurs a 5% upcharge on top of the basic cost per our current price list. See bottom left for an example of a 6725 in rose-gold finish with black balls. Changing the colour of the balls to any non-metal finish (e.g. blue, red, purple) incurs a 5% upcharge.

Changing the colour of the balls to a metallic finish requires the sputniks to be made of metal instead of wood and incurs an upcharge of 10%. See bottom right for an example of a 6725 with nickel balls.

All percentages stack! So a chandelier with metal sputniks and custom finish of the rays incurs an upcharge of 15%. (10% for the metal sputniks and 5% for the custom finish.)
